DETAILED ACTION

This action is in response to Appeals Brief filed February 23, 2004. All applicant's arguments have been considered.

Response to Arguments

Applicant's arguments, see Appeals Brief, filed February 23, 2004, with respect to claims 1-17 have been fully considered and are persuasive. The rejection of claims 1-17 has been withdrawn.

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 12 and 13, the prior art of record teaches the use of activating an array of member with conductors passing through via holes. Electorstatically activated members are also taught in the prior art of record. However, one of ordinary skill in the art would not find it obvious to combine the teachings of electrostatically activated members with the teachings of conductors passing through via holes. The combination of prior art teaches is not obvious because the prior art with regards to the conductors in via holes solely teaches direct electrical

connection to activate the members and does not suggest that the members could be adapted to operate with electrostatically activation. The prior art of record fails to teach or suggest an array of electrostatically activated members on a silicon layer, having a ceramic substrate with via holes and conductors formed in the via holes, the conductors being separate from the silicon layer and the conductors selectively operate the array of electrostatically activated members.

The remaining claims depend from claims 1 and 13 and are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
